

Online Pizza Ordering System

There are a variety of food items available on this planet. Each country has its own kind of dishes to offer. But if we pick a food item which is loved by all the people on this planet, then pizza will be a clear winner in it.

The process seems easy to use but at times there is miscommunication.

As there is no visual menu shown during a phone call, the employees have to repeat a lot of things again and again to the customers.

It's a time-consuming process which at times irritates customers. Also, it takes a lot of time of the pizzeria staff.

It would be much more comfortable for the customers to have an online pizza ordering system. It would be hassle-free for users as they can select the pizzas they want and make payment for it. Also, it will reduce the purchasing time for customers. Wouldn't it be much more convenient if I ordered my pizzas before using a mobile app or an online system and then it will tell me the time by which I have to pick my order from their counter?

It would be great for me as I don't need to wait for my pizza. I need to reach there only when my pizza is ready.

The main objectives of this ordering system are:

Build your own pizza – This system will help customers in ordering custom pizzas. So the customer will pick exactly the things which he/she wants in their pizza. This will surely enhance the image of the pizzeria and customer satisfaction will be more.

Online Payment- This system will give the option to the customer for online payment. This will make pizza buying experience cash free.

Better Knowledge- This system will provide customer all the details of his order before making the order. This confirmation will help customers to check the items ordered with their prices.

Know Delivery Time- This system will show the time by which the order will be delivered to the customer. For pick-ups, customers can fix the time by which they will pick their order.

Reduce Paper Work- As most of the things will be performed online, it will reduce the usage of paper for the pizzeria.

Improves Efficiency- This system will make things easier for staff as whole ordering process is done by the customer only.

These were the objectives of the online pizza ordering System. Let us now get into the details of the working of this ordering system.
